

Timber Decking

As more of us are spending our leisure time outdoors, where better to enjoy an informal meal with friends and family than on the deck? It is the perfect solution for sloping sites or terracing, and it's a great way of joining the house to the garden, or creating all-year outdoor surfaces for pubs, restaurants, hotels, leisure facilities, and communal spaces.

All Jacksons' decking boards are grooved to aid slip resistance and made from premium quality Jakcure® treated softwood, guaranteed for 25 years. There are three board types available - standard, heavy duty, and slip resistant heavy duty.

To see our latest prices, view our Decking & Balustrade on our website by scanning the QR code

Decks are constructed with spaces between boards to aid drainage and to allow for the natural expansion and shrinkage of the timber, while all fixings and fastenings are non-rusting to ensure an extra-long life.

Decking Boards & Fixings

Detail of decking board profile showing the grooves on top surface and the stress relief cuts on the bottom surface of boards to help avoid warping as boards expand and contract with the weather conditions.

Slip resistant Decking

Slip resistant boards are made from premium quality Jakcure® treated softwood and guaranteed for 25 years. They feature grooves and two additional non-slip grit strips per board, which means when the boards get wet, the grit sections provide added grip.

Please be aware that the grit strip does sit slightly above the level of the decking to allow for extra grip, so if someone was to fall on these boards there could be a risk of grazing.
